

PROPHYLACTIC COVERS FOR DENTAL INSTRUMENTS
AND METHODS FOR MAKING THE SAME

ABSTRACT OF THE DISCLOSURE

5 A prophylactic system 100 for a dental hand piece 101
of a selected shape and having an outlet 112 for providing a
fluid to an operating field is disclosed. A cover 102 has a
shape substantially similar to the hand piece 101 for
enclosing the dental hand piece 101 and includes an aperture
118 for communicating with the operating field. An s-shaped
10 valve 600 includes a path 605 for coupling the fluid from
outlet 118 of the hand piece 101 to the aperture 118 of the
cover.
